

UPGRADABLE DATA911 I9

The new, compact, **BMS/Data911 I9** vehicle-mounted, rugged mobile data computer has all the reliability, features, and ergonomics customers have come to expect from Data911. The Data911 I9's all-electronic, all-in-one, modular unit is designed to evolve as technology evolves. There is no need to replace the entire system every few years. Simply remove the CPU to replace or upgrade components. The Data911 I9's advanced design reduces operating costs over time while ensuring exceptional standards of performance—for a higher quality, long-term investment.

Offered in two multi-touch display sizes, 12.1-inch (4:3) and 15.6-inch (16:9 HD)

FEATURES

- Powerful 7th Generation Intel® Core™ i7 processor
- Intel HD Graphics 620
- 16GB RAM standard
- Large capacity, solid-state drives (up to 512 GB)
- Windows® 10 Enterprise LTSC operating system
- Integrated GPS receiver with external antenna
- Integrated Wi-Fi (802.11 ac) modem with dual external MIMO antennas
- Integrated 4G LTE Broadband modem with dual external antennas
- Power ignition, voltage, and temperature sensing
- Multiple USB and Ethernet connections
- Field access to GPS, 4G LTE Broadband, SSD, and memory modules
- -30° to +70°C operating temperature
- 1000 NITS sunlight-readable 12.1" display
- Multi-touch, capacitive screen
- Chemically-strengthened, high resolution LCD display
- Four programmable action buttons
- Display port for secondary display viewing
- Standard VESA mount pattern (75 x 75 and 100 x 100)
- 3-year warranty (extendable)
- FCC and CE compliant
- Advanced, CIIS-compliant security
- Airbag-compliant, safety mount
